

FORCE 7 AERATOR

“Mechanical aeration made simple.”

The Force 7 Aerator is perfect for small to medium water bodies. This is a non-ornamental solution that injects and circulates oxygen into your water body, controlling any algae or aquatic weeds and maintains a healthy-looking clear body of water. Great for lakes and ponds in farms, golf courses, nurseries and wineries in which functionality is needed more, than a fancy visual appearance.

The Force 7 is a compact, robust, lightweight & easy handle aeration device with unrivalled performance characteristics. Being submersible in design, this unit can be positioned at depths of up to 15.0 metres below the water surface via the use of extension snorkels.

Key Features

- To quickly raise the oxygen level in emergency situation.
- Double propeller for great flow in order to have the best oxygen transfer rate.
- Lightweight, easy to handle and move from a basin to another.
- Best performances in fresh water applications, also useful for brackish and seawater installations.
- Low energy consumption.
- Corrosion resistant
- Depth and orientation adjustable

Technical Data

Supply Requirements (V)	Rated Power (HP)	Rated Power (KW)
240 Single Phase	1.5	1.1
415 Three Phase	1.5	1.1

Rated Power (KW)	Rated Current (A)	O2 Delivery Rate* (m ³ O ₂ /Hr) 3.3
1.1	7.5	3.3
1.1	7.5	3.3
